3,000+ Doctors, Scientists Accuse COVID Policy Makers of 'Crimes Against Humanity'

By [Human Events Staff](#) | September 27, 2021

An international group of physicians and scientists signed a declaration Friday accusing COVID-19 policy-makers of "crimes against humanity" for preventing the use of life saving treatments on their patients.

The document, which obtained over 3,100 signatures around the world, blasts the "one size fits all" treatment recommendations, which have resulted in illness and death.

As reported by [American Greatness](#), a group of doctors and scientists met in Rome earlier this month for a Global Covid Summit to discuss pandemic research and treatment. The summit gave the group an opportunity to compare studies and assess the effectiveness of treatments.

"[The Physicians' Declaration](#) was first read at the Rome Covid Summit, catalyzing an explosion of active support from medical scientists and physicians around the globe," the document reads. "These professionals were not expecting career threats, character assassination, papers and research censored, social accounts blocked, search results manipulated, clinical trials and patient observations banned, and their professional history and accomplishments altered or omitted in academic and mainstream media."

"Thousands have died from Covid as a result of being denied life-saving early treatment," it continues. "The Declaration is a battle cry from physicians who are daily fighting for the right to treat their patients, and the right of patients to receive those treatments – without fear of interference, retribution or censorship by government, pharmacies, pharmaceutical corporations, and big tech."

"We demand that these groups step aside and honor the sanctity and integrity of the patient-physician relationship, the fundamental maxim 'First Do No Harm,' and the freedom of patients and physicians to make informed medical decisions. Lives depend on it," the document adds.

It continues:

WHEREAS, it is our utmost responsibility and duty to uphold and restore the dignity, integrity, art and science of medicine;

WHEREAS, there is an unprecedented assault on our ability to care for our patients;

WHEREAS, public policy makers have chosen to force a "one size fits all" treatment strategy, resulting in needless illness and death, rather than upholding fundamental

concepts of the individualized, personalized approach to patient care which is proven to be safe and more effective;

WHEREAS, physicians and other health care providers working on the front lines, utilizing their knowledge of epidemiology, pathophysiology and pharmacology, are often first to identify new, potentially life saving treatments;

WHEREAS, physicians are increasingly being discouraged from engaging in open professional discourse and the exchange of ideas about new and emerging diseases, not only endangering the essence of the medical profession, but more importantly, more tragically, the lives of our patients;

WHEREAS, thousands of physicians are being prevented from providing treatment to their patients, as a result of barriers put up by pharmacies, hospitals, and public health agencies, rendering the vast majority of healthcare providers helpless to protect their patients in the face of disease. Physicians are now advising their patients to simply go home (allowing the virus to replicate) and return when their disease worsens, resulting in hundreds of thousands of unnecessary patient deaths, due to failure-to-treat;

WHEREAS, this is not medicine. This is not care. These policies may actually constitute crimes against humanity.

NOW THEREFORE, IT IS:

RESOLVED, that the physician-patient relationship must be restored. The very heart of medicine is this relationship, which allows physicians to best understand their patients and their illnesses, to formulate treatments that give the best chance for success, while the patient is an active participant in their care.

RESOLVED, that the political intrusion into the practice of medicine and the physician/patient relationship must end. Physicians, and all health care providers, must be free to practice the art and science of medicine without fear of retribution, censorship, slander, or disciplinary action, including possible loss of licensure and hospital privileges, loss of insurance contracts and interference from government entities and organizations – which further prevent us from caring for patients in need. More than ever, the right and ability to exchange objective scientific findings, which further our understanding of disease, must be protected.

RESOLVED, that physicians must defend their right to prescribe treatment, observing the tenet FIRST, DO NO HARM. Physicians shall not be restricted from prescribing safe and effective treatments. These restrictions continue to cause unnecessary sickness and death. The rights of patients, after being fully informed about the risks and benefits of each option, must be restored to receive those treatments.

RESOLVED, that we invite physicians of the world and all health care providers to join us in this noble cause as we endeavor to restore trust, integrity and professionalism to the practice of medicine.

RESOLVED, that we invite the scientists of the world, who are skilled in biomedical research and uphold the highest ethical and moral standards, to insist on their ability to conduct and publish objective, empirical research without fear of reprisal upon their careers, reputations and livelihoods.

RESOLVED, that we invite patients, who believe in the importance of the physician-patient relationship and the ability to be active participants in their care, to demand access to science-based medical care.

A “Physicians’ Declaration” produced by an international alliance of physicians and medical scientists strongly condemns the global strategy to treat COVID, accusing policy-makers of potential “crimes against humanity” for preventing physicians from providing life-saving treatments for their patients and suppressing open scientific discussion.

The document states that “one size fits all” treatment recommendations have resulted in needless illness and death.

As of 1:00 Friday afternoon, the declaration had garnered over 3,100 signatures from doctors and scientists around the world. (*See below for updated number*).

A group of physicians and scientists met in Rome, Italy earlier this month for a three day [Global Covid Summit](#) to speak “truth to power about Covid pandemic research and treatment.”

The summit, which was held from September 12 to September 14, gave the medical professionals an opportunity to compare studies, and assess the efficacy of the various treatments that have been developed in hospitals, doctors offices and research labs throughout the world.

The document, reprinted below in its entirety, [sprang from a physicians conference in Puerto Rico](#).

The Physicians’ Declaration was first read at the Rome Covid Summit, catalyzing an explosion of active support from medical scientists and physicians around the globe. These professionals were not expecting career threats, character assassination, papers and research censored, social accounts blocked, search results manipulated, clinical trials and patient observations banned, and their professional history and accomplishments altered or omitted in academic and mainstream media.

Dr. Robert Malone, architect of the mRNA vaccine platform, read the Rome Declaration at the summit.

Thousands have died from Covid as a result of being denied life-saving early treatment. The Declaration is a battle cry from physicians who are daily fighting for the right to treat

their patients, and the right of patients to receive those treatments – without fear of interference, retribution or censorship by government, pharmacies, pharmaceutical corporations, and big tech. We demand that these groups step aside and honor the sanctity and integrity of the patient-physician relationship, the fundamental maxim “First Do No Harm”, and the freedom of patients and physicians to make informed medical decisions. Lives depend on it.

We the physicians of the world, united and loyal to the Hippocratic Oath, recognizing the profession of medicine as we know it is at a crossroad, are compelled to declare the following;

WHEREAS, it is our utmost responsibility and duty to uphold and restore the dignity, integrity, art and science of medicine;

WHEREAS, there is an unprecedented assault on our ability to care for our patients;

WHEREAS, public policy makers have chosen to force a “one size fits all” treatment strategy, resulting in needless illness and death, rather than upholding fundamental concepts of the individualized, personalized approach to patient care which is proven to be safe and more effective;

WHEREAS, physicians and other health care providers working on the front lines, utilizing their knowledge of epidemiology, pathophysiology and pharmacology, are often first to identify new, potentially life saving treatments;

WHEREAS, physicians are increasingly being discouraged from engaging in open professional discourse and the exchange of ideas about new and emerging diseases, not only endangering the essence of the medical profession, but more importantly, more tragically, the lives of our patients;

WHEREAS, thousands of physicians are being prevented from providing treatment to their patients, as a result of barriers put up by pharmacies, hospitals, and public health agencies, rendering the vast majority of healthcare providers helpless to protect their patients in the face of disease. Physicians are now advising their patients to simply go home (allowing the virus to replicate) and return when their disease worsens, resulting in hundreds of thousands of unnecessary patient deaths, due to failure-to-treat;

WHEREAS, this is not medicine. This is not care. These policies may actually constitute crimes against humanity.

NOW THEREFORE, IT IS:

RESOLVED, that the physician-patient relationship must be restored. The very heart of medicine is this relationship, which allows physicians to best understand their patients and their illnesses, to formulate treatments that give the best chance for success, while the patient is an active participant in their care.

RESOLVED, that the political intrusion into the practice of medicine and the physician/patient relationship must end. Physicians, and all health care providers, must be free to practice the art and science of medicine without fear of retribution, censorship, slander, or disciplinary action, including possible loss of licensure and hospital privileges, loss of insurance contracts and interference from government entities and organizations –

which further prevent us from caring for patients in need. More than ever, the right and ability to exchange objective scientific findings, which further our understanding of disease, must be protected.

RESOLVED, that physicians must defend their right to prescribe treatment, observing the tenet FIRST, DO NO HARM. Physicians shall not be restricted from prescribing safe and effective treatments. These restrictions continue to cause unnecessary sickness and death. The rights of patients, after being fully informed about the risks and benefits of each option, must be restored to receive those treatments.

RESOLVED, that we invite physicians of the world and all health care providers to join us in this noble cause as we endeavor to restore trust, integrity and professionalism to the practice of medicine.

RESOLVED, that we invite the scientists of the world, who are skilled in biomedical research and uphold the highest ethical and moral standards, to insist on their ability to conduct and publish objective, empirical research without fear of reprisal upon their careers, reputations and livelihoods.

RESOLVED, that we invite patients, who believe in the importance of the physician-patient relationship and the ability to be active participants in their care, to demand access to science-based medical care.

Update:

As of Monday afternoon, Sept. 28, over 4,600 physicians and medical scientists worldwide had signed the Rome Declaration.

As of 10:30am ET on Sept. 29, over 7,200 doctors and scientists had signed the Rome Declaration.
